

How to connect to X9000 shared User directories on CALIBUR 1 Macintosh computer using OSX 10.6

Click on GO at top of Desktop tray

Click Connect to server at bottom of drop down list

Server Address:

Smb://flowcyto/flowresearch\$/PI<name>

(Remember the \$ after flowresearch)

(you may use the + key to add the address as a favorite)

(Eliminating the /PI<name> will display all available folders)

Click Connect

If successful another dialog will open:

Use your Roswell network logon credentials in the form displayed above. Remember the Roswell\ in front of your logon name with the correct slash.

If you have "Show Connected Servers" selected in the finder preferences will show your PI<name> folder on the Desktop
